About Me

Data Scientist with 5+ years of experience across the full ML lifecycle — from designing models and running experiments to deploying and maintaining production pipelines. Have worked mainly on recommendation systems and demand forecasting in e-commerce, and on deep learning for medical imaging during my graduate research. I enjoy the engineering side of ML as much as the modelling, and am looking for ML Engineer or MLOps Engineer roles.

Experience

***Data Scientist*, MigrosOne, Remote** (via StartupHeroes) **Mar 2021 — Present**

Working in MigrosOne's data team building and maintaining ML models for the e-commerce platform, covering the full lifecycle from experimentation to production deployment on AWS SageMaker.

- Managed and optimized training pipelines for a hybrid cart prediction engine (MultiDAE via RecBole and XGBoost), streamlining data flows for processing historical user interactions.
- Prototyped a multi-objective reranking layer for retrieval models, configuring custom utility functions to balance relevance (MAP, Hit Rate), catalog diversity, and business constraints.
- Maintained pipeline infrastructure for a granular time-series model forecasting delivery slot utilization, ensuring reliable data delivery for dynamic pricing strategies.
- Managed deployment and lifecycle of real-time and offline recommendation endpoints (basket-based and product similarity), supporting models that attribute up to 11% of order revenue.
- Resolved memory bottlenecks in large-scale Parquet pipelines, reduced training latency via GPU scaling and batch tuning, and modernized production workflows through SDK upgrades and standardized error handling.
- Built a LangGraph-based agent with a custom UI, including step-level observability (token usage, inter-step latency) for monitoring and debugging agent runs.

Skills: AWS SageMaker, Google BigQuery, PyTorch, Pandas, PySpark, XGBoost, RecBole, LangGraph

***Graduate Researcher*, HistoCan, Ankara/Turkey** **Mar 2021 — Aug 2024**

Researched and developed deep learning models for medical image segmentation of cancerous tissues from histopathology slides, with a focus on grading accuracy improvements over classical approaches. Set up and maintained the AWS environment for dataset management and distributed model training.

Skills: AWS, PyTorch, OpenMMLab, CLIP

***Undergraduate Researcher*, KOVAN Research Lab, Ankara/Turkey** **Sep 2019 — Jun 2020**

Worked on integrating motion planning modules for the UR5 cobot and improving human-robot interaction quality as part of the Apprentice Project (TUBITAK-funded), under Assoc. Prof. Erol Şahin.

***Intern*, Vodafone GmbH, Düsseldorf/Germany** **Jun 2018 — Dec 2018**

Developed a Smart Delivery Solution prototype in the Vodafone Innovation Park, exploring 5G-enabled logistics use cases.

***Intern*, Arçelik Group, Ankara/Turkey** **Jul 2017 — Sep 2017**

Worked on the adaptation of continuous integration to a business intelligence tool with Ruby on Rails. Wrote tests for the automated deployment procedure with AWS.

Education

***MSc. in Computer Engineering*, Middle East Technical University** — **Sep 2021 — Aug 2024**
Ankara/Turkey

cGPA: 3.80/4.00
Thesis: Detecting cancer tissue grade from histopathology images using deep learning.
(Advisor: Asst. Prof. Emre Akbaş)

***MSc. in Computer Science (Transferred)*, The University of Bonn** — **Oct 2020 — Apr 2021**
Bonn/Germany

***BSc. in Computer Engineering*, Middle East Technical University** — **Sep 2014 — Jul 2020**
Ankara/Turkey

cGPA: 3.29/4.00
Graduation Project:
GLaTeX, a tool for editing and compiling LaTeX within Google Docs. (Supervisor: Asst. Prof. Emre Akbaş)

Language Skills

Turkish	**Persian**	**English**	**German**
Native	Native	Proficient (IELTS 7.5)	Intermediate

Technical Skills

Languages	Python, C++, C, C#, Java, JavaScript, Ruby, MATLAB, SQL
Technologies	AWS SageMaker, Google BigQuery, Google Firebase, Airflow, Next.js
Libraries	PyTorch, LangChain, sklearn, PySpark, NumPy, Pandas, MoveIt, NLTK
Frameworks	ROS, Unity, Django, Ruby on Rails
Hardware	Raspberry Pi, Arduino, Ink Display, 3D Printing

Certified Trainings

Introduction to Tensorflow by deeplearning.ai, Coursera, Sep 2020

Neural Networks and Deep Learning by deeplearning.ai, Coursera, July 2020

Applied Cryptography Winter School , METU, Ankara/Turkey, Feb 2019

Extracurricular Activities

***Tonmeister / Sound Engineer*, Freelance** — **2014 — Present**

Mixed and recorded live performances for orchestras, musical shows, and bands.

***Conductor*, METU "The Company" Musicals** — **2022 — 2023**

Conducted a 16 piece orchestra for the Broadway show "Big Fish".

***Music Director*, Lemur Sanat** — **2019 — 2020**

Directed the Broadway show "Once" in a semi-professional organization for a long-term production.

***Music Director*, METU "The Company" Musicals** — **2014 — 2016**

Directed two Broadway shows; Addams Family The Musical, Urinetown The Musical and two self-written musical shows. Worked with a team of more than 50 people, rehearsed with orchestra and the cast.
